

Recent Drug Formulary Updates – June 2019

- *Generic Ventolin HFA and ProAir Inhalers* are now on formulary! A quantity limit of 2 inhalers per month continues to be in place. If your patient requires more than 2 albuterol inhalers per month, please evaluate use of maintenance medications for asthma or COPD. A prior authorization will be required for more than 2 albuterol inhalers per month.
- *Generic EpiPen and Adrenaclick* are now on formulary with a quantity limit of 2 fills per year. A prior authorization will be required for use greater than 2 fills per year. There continue to be reported shortages of injectable epinephrine products.
- Primary Care Providers can now prescribe Hepatitis C Direct Acting Antivirals! Check out our list of resources and the Fee-For-Service Drug Use Criteria to learn more!
