Recent Drug Formulary Updates: Effective now unless otherwise specified

- Theophylline has been removed from formulary and requires a prior authorization.
- Tizanidine 2mg and 4mg tablets added to formulary under step therapy edit after trial of cyclobenzaprine or methocarbamol.
- Buprenorphine and buprenorphine containing products will require a prior authorization after the initial 30 days of treatment for Opioid Use Disorder (OUD). **Effective September 1, 2021.**
